Technical Specification

Gasketed plate-and-frame heat exchanger Date: Saturday, November 1, 2025

Type: T2-BFG-12H Article number: T2-BFG-12H-

316-0.5-NBRP-ISO-R ³/₄ ALS

Alfa Laval Industrial line are gasketed plate-and-frame heat exchangers available in a variety of designs suitable for practically all types of industrial application for heating and cooling. A large product range and flexible configuration makes it possible to get a good fit for the applications. The units have high energy efficiency, easy installation and are easy to open for inspection and cleaning.

The Alfa Laval Industrial line Gasketed plate-and-frame heat exchangers are produced in accordance with the quality management system ISO 9001, the environmental management system ISO 14001 and the European Pressure Equipment Directive 2014/68/EC. AutoCAD drawings, 3D models and accessories are available as options.

Capacity (kW): 20 kW Temp primary side (°C): 85 \rightarrow 70 °C Temp. secondary side (°C): 50 \rightarrow 70 °C Flow rate primary side (m³/h): 0,9 m3/h Flow rate secondary side (m³/h): 0,9 m3/h Max. Pressure Drop (kPa): 50 kPa
