## **Technical Specification**

Gasketed plate-and-frame heat exchanger Date: Wednesday, 5 November 2025

Type: T2-BFG-7H Article number: T2-BFG-7H-

316-0.5-NBRP-ISO-R ¾ ALS

Alfa Laval Industrial line are gasketed plate-and-frame heat exchangers available in a variety of designs suitable for practically all types of industrial application for heating and cooling. A large product range and flexible configuration makes it possible to get a good fit for the applications. The units have high energy efficiency, easy installation and are easy to open for inspection and cleaning.

The Alfa Laval Industrial line Gasketed plate-and-frame heat exchangers are produced in accordance with the quality management system ISO 9001, the environmental management system ISO 14001 and the European Pressure Equipment Directive 2014/68/EC. AutoCAD drawings, 3D models and accessories are available as options.

Capacity (kW): 15 kW
Temp primary side (°C): 50  $\rightarrow$  44 °C
Temp. secondary side (°C): 15  $\rightarrow$  32 °C
Flow rate primary side (m³/h): 1,3 m3/h
Flow rate secondary side (m³/h): 0,8 m3/h
Max. Pressure Drop (kPa): 50/30 kPa
